The Title Link 2000

A newsletter of math and reading resources

May 2015

Hooray!! The last dismissal bell of the year rings. School is out! Students are thinking of sleeping in and long, lazy days at the pool. Parents and teachers are thinking of how they are going to stop summer learning loss. The summer reading statistics are concrete and show the importance of keeping your child reading and academically active during the summer months.

Statistics show that there is a loss of learning when young people are not in school during the summer.

It is estimated that school summer breaks will cause the average student to lose up to one to three months of instruction. If you take into consideration all summers combined, students could possibly lose 1.5 years worth of reading progress and an equivalent amount of loss in math computation skills.

Read on to find helpful tips and activities to help avoid your child's summer brain drain.

Grades K-6 Reading

Three Ways to Prevent Summer Slide

1. Six books to summer success: Research shows that reading just six books during the summer may keep a struggling reader from regressing.

- 2. Read something every day: Encourage your child to take advantage of every opportunity to read.
- 3. **Keep reading aloud:** Reading aloud benefits all children and teens, especially those who struggle Click to Read the Entire Article

Reading Activities at Mealtime

Reading Activities in the Neighborhood

Reading Activities in Front of the TV

Not everyone can take off on a plane to a tropical island or have a chance to go to **Graceland to visit Elvis** Presley's home.

These ideas for summer excursions bring your child's favorite books to life.

Consider your child's favorite stories – perhaps old classics, or something new he read during the past school year. Notice the themes that emerge, and plan a related trip. This is a fun way to support your child's curiosity about the subjects she loves most. We've identified some popular genres and suggested some activities below that the whole family can eniov.

If your child loves...

- **Adventure**
- **Animals**
- **Comic Books**
- **Mysteries**
- Etc...

Click to start on an adventure with your child.

Week 1

Grades 7-12 Reading

Ways to encourage teens to read. . .

- **Set an example.** Let teens see you reading for pleasure.
- Furnish your home with a variety of reading materials. Leave books, magazines, and newspapers around. Check to see what disappears for a clue to what interests your teenager.
- Give teens an opportunity to choose their own books. When you and your teen are out together, browse in a bookstore or library. Go your separate ways and make your own selections. A bookstore gift certificate is a nice way of saying, "You choose."
- **Build on your teen's interests.** Look for books and articles that feature their favorite sports teams, rock stars, hobbies, or television shows. Give a gift subscription to a special interest magazine.
- View pleasure reading as a value in itself. Almost anything your youngsters read including the Sunday comics—helps build reading skills.
- Read some books written for teens. Young adult novels can give you valuable insights into the concerns and pressures felt by teenagers. You may find that these books provide a neutral ground on which to talk about sensitive subjects.
- Make reading aloud a natural part of family life. Share an article you clipped from the paper, a poem, a letter, or a random page from an encyclopedia—without turning it into a lesson.
- Acknowledge your teen's mature interests. Look for ways to acknowledge the emerging adult in your teens by suggesting some adult reading you think they can handle.

Keep the big picture in mind. For all sorts of reasons, some teenagers go through periods without showing much interest in reading. Don't panic! Time, and a few tips from this article, may help rekindle their interest.

Help your teen choose a book by clicking

THE YOUNG ADULT BOOK CLUB

Join one of the many young adult online book clubs. These clubs provide you with interesting books to read and a forum to discuss your views and to let your voice be heard.

The Young Adult Book Club, the largest community of YA Lovers. Where we have proven to enjoy Hardbacks over Paperbacks, Vampires over Werewolves and even Unicorns over Zombies.

Oprah's Book Club is a popular book club that can have online or inperson participation in an organized book club.

Goodreads is a reader's social networking site where reviews can be written, read and shared. This online community includes an annual reading challenge, a reader-created booklist section, author events and online book clubs including one for teens.

Hoosier Readers Score Big!

Read in the bathtub! (No water, just blankets.)	Read in a blanket fort	READ WHILE EATING A SNOW CONE (CAREFULLY!)	Read to yourpet	Have a "Reading Party" with friends and treats
READ A MAGAZINE ARTICLE	Read a whole page of a book backwards	Read in a tent	Read to someone who can't read	Read with a flashlight
Read a book you loved when you were younger	Read for 30 minutes	Free Space	Read on the swings	Read under the kitchen table
Read with an accent	Read on a family road trip	Readapoemand performforfriends	Read a newspaper article	Read for 1 hour
Swap favorite books with a friend and read	Read while eating a picnic lunch	Take turns reading a page at a time with a sibling or friend	Read to a relative over the phone or computer	Read a book you love again!
READ ON A BEACH BLANKET	Read by the pool	Read by a campfire	Read while eating ice cream	Read with your sunglasses

Click to get your Hoosier Score Board Card

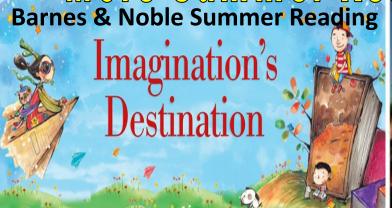

Read, read, read this summer!! Complete the score board card and receive a prize. Score boards can either be k-mailed to Dana Smith or mailed to Hoosier Academy

Go Shopping

We hope enjoy our June and July activity calendar. As the summer starts, it can be tempting to take a vacation from education. But learning opportunities abound outside. - See more at: http://www.dreambox.com

Math games which are designed to make learning fun!! Click to be taken to <u>Math Goodies</u> to start playing one of these fun interactive games.

Math Games	Visual	Description	
math Games	Visuai		
Circumference and String		This animation uses string to show the circumference of a circle. Kids will see why circumference is measured in linear units.	
The Decimal Dance	e	Want to dance your decimal? This animation shows students how to multiply decimals and then place the decimal point!	
Factor Tree Game	-	Find all prime factors of composite number with our factor tree game. Different trees can be generated for the same composite number.	
Fraction Goodies		Have fun testing your knowledge of fractions with game. It includes three levels of difficulty and scoring. It is three games in one.	
Geometry and a Shoebox		This animation demonstrates the properties of various quadrilaterals. A Gumby action figure is included.	
Integer Football	IFL	Integer Football is a unique game that combines integer addition with the plays of a football game. There are two multimedia and two printable games. Come and play in the IFL!	
Percent Goodies		Convert between fractions, decimals and percents the fun way. There are three levels of difficulty, with instant scoring for each. Test your knowledge of conversions.	
PEMDAS Goodies	36-3×4 15-9÷3	Test your knowledge of the order of operations (PEMDAS) with this exciting interactive game. It includes three levels of difficulty and scoring. You get three games in one.	
Perimeter and String	•••	This animation uses string to show the perimeter of a rectangle. Watch as perimeter comes alive on your screen!	
Probability Goodies		Want to roll some dice? This game lets you experiment with interactive dice rolls and tracks the sums. It also has an interactive quiz with instant scoring. You can also control the 3D movements of the dice with your mouse! You get three math games in one!	

Grades 7-12 Math

Help your student manage money!

Summer is a great time to think about vacations and how far you can stretch a dollar! Give your student a budget and have them research and plan a vacation for your family!

Use the following guidelines to help them plan.

For flights, hotels, and rental car information, go to www.expedia.com.

For driving distance, use www.mapquest.com and calculate gas at \$2.85/gallon. 1 gallon = 25 miles.

Destination:	Dates of Travel:
How will you get there (fly or drive)?	Continue planning your vacation budget.
Where will you stay?	

Tips to Help Your Teen Avoid the Summer Math Slide

Tom Reardon, a math adviser for Texas Instruments and a retired math teacher with 35 years of experience in the classroom, offers these tips to keep teens flexing their math muscles all summer long.

- **Get a job.** Teens who tutor over the summer can actively brush up on the subjects they've learned over the past few years. Even working in the mall will keep your teen's brain filled with numbers. She'll be shocked to see how much is taken out of each paycheck for taxes and social security. Ask her to figure out the percentage! You can also help her come up with a weekly budget or savings plan.
- **Sign up for an educational summer program or camp.** Your local library and recreation department offer affordable group activities for teens.
- **Take a class.** If your teen never really grasped logarithms, she can retake Algebra 2 at a local community college this summer.
- **Volunteer!** Museums, libraries, and most non-profit organizations are a great place to explore future career possibilities and keep your teen thinking all summer.

Math on the Net

Believe it or not, the Internet is more than a portal to Facebook. Get started with Education.com's worksheets, activities, and study help. Don't forget to set participation goals with your teen. As Tom reminds us, "Doing a little bit at a time and more often is much better than doing a whole lot once in a while."

- KenKen is a challenging math logic game. Print out KenKen worksheets from your computer and get puzzling!
- Check out our SAT prep and math activities for painless summer studying.
